- Product/Item Maintenance
- Warehouse settings
- Invoices

Commission Plan Management

Reporting

Email and SMS Communications (Double Opt-in and Opt-Out Required on ALL emails):

User Management and Security

System Admin and Setting

DNS Management

Internationalization (Standard, Enterprise, and Enterprise Plus Editions only)

SQL Sync User Management

Exigo Web Services Library available at <http://api.exigo.com>.

Access to the Order Calc SDK

Commission SDK:

Exigo offers a Commission SDK that allows for testing and step thru debugging of your commission code using mock data. Parameter changes to the configuration files can also be made and tested in this environment. Once programming and configuration changes are completed and tested they can be uploaded to the staging area for validation against real data, and ultimately published to your live environment.

On-Demand Services at additional cost by Exigo On-Demand, LLC:

- You Host Replicated Reporting SQL 2016 Business Intelligence available at <http://bi.exigo.com>
- Admin/Web Development Sandbox 1 through 8 for testing (may not be available for Express Edition)
- Sandbox 100 – for commission plan modeling and changes to your commission plan
- SMS outbound text messaging
- SendGrid email broadcast
